Department : CSE
College Name: SCAD College Of
Engineering And Technology
Project Title : HR Analytics
Dashboard Using Excel And Power BI

❑ PROJECT OVERVIEW

📊 HR ANALYTICS DASHBOARD

1) This Project Is About Analyzing Human Resource (HR) Data Using **Excel And Power BI**.

2)The Main Goal Is To Understand Employee Information And Improve HR Decision-making.

3)It Helps To Visualize Important HR Metrics In A Simple Dashboard Format.

4)The Dataset Includes Employee Details Like **Department, Salary, Experience, And Attrition**.

🎯 OBJECTIVE

1)To Analyze Employee Data Clearly Using Charts And Dashboards

2)To Identify Patterns In Attrition, Salary, And Department Distribution

3)To Present Insights In A Visual And Easy-to-understand Way

Tools & Technologies

Microsoft Excel

- 1) Used for data cleaning and basic calculations
- 2) Helps to organize employee data
- 3) Used for formulas like count, average, percentage

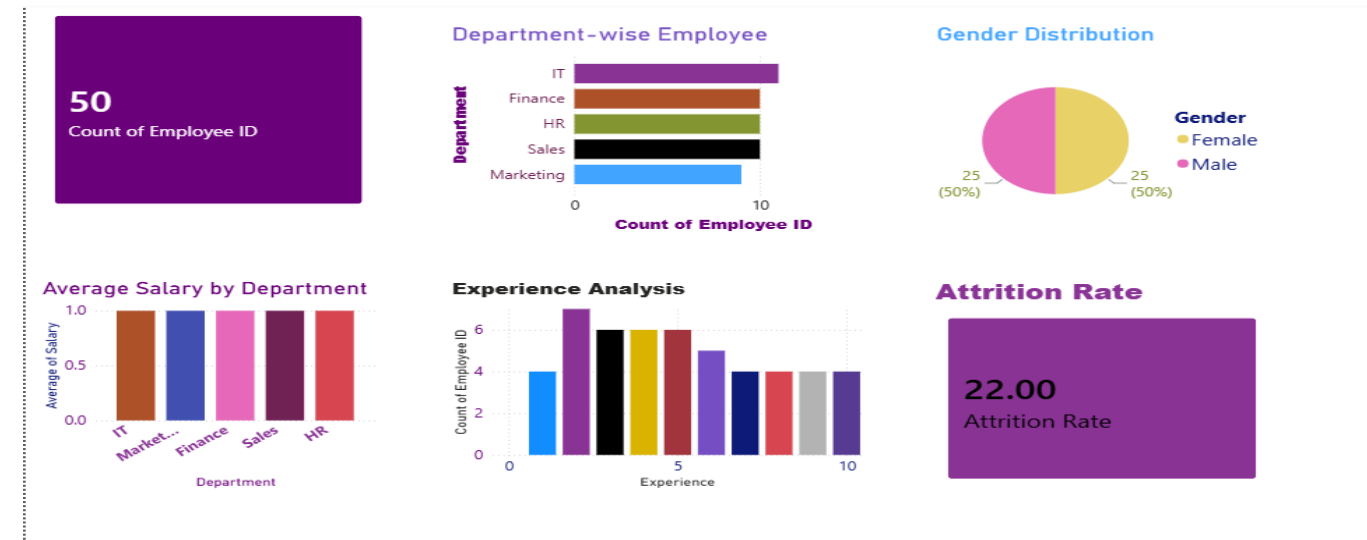

Power BI

- 1) Used to create interactive dashboards
- 2) Helps in creating charts and visuals
- 3) Used for analyzing HR metrics like attrition, salary, experience

Dataset

- 1) HR employee dataset (Excel file)
- 2) Contains details like Department, Salary, Experience, Attrition

Employee ID	Employee Name	Gender	Department	Salary	Experience	Attrition
001	Arun	Male	HR	30000	2	No
002	Priya	Female	IT	45000	4	Yes
003	Karthik	Male	Finance	40000	3	No
004	Divya	Female	HR	35000	5	No
005	Rahul	Male	IT	50000	6	Yes
006	Sneha	Female	Sales	32000	2	No
007	Vijay	Male	Finance	42000	4	No
008	Anitha	Female	Marketing	38000	3	Yes
009	Suresh	Male	Sales	36000	2	No
010	Kavya	Female	IT	48000	5	No
011	Ajay	Male	HR	35500	2	No
012	Meena	Female	Finance	36000	3	No
013	Sanjay	Male	IT	36500	4	No
014	Nisha	Female	Marketing	37000	5	No
015	Ramesh	Male	Sales	37500	6	Yes
016	Emp16	Female	Finance	38000	7	No
017	Emp17	Male	IT	38500	8	No
018	Emp18	Female	Marketing	39000	9	No
019	Emp19	Male	Sales	39500	10	No
020	Emp20	Female	HR	40000	1	Yes
021	Emp21	Male	Finance	40500	2	No
022	Emp22	Female	IT	41000	3	No
023	Emp23	Male	Marketing	41500	4	No

EMPLOYEE COUNT

- This slide shows the total number of employees in the HR dataset.
- It provides an overview of the organization's workforce
- . The total employee count is displayed using a **Card Visual** in Power BI.
- This metric serves as the basis for further HR analysis.

Key Points

- 1) Total employees in the dataset: **50**
- 2) Employee Count is displayed using a **Card Visual**.
- 3) Provides a quick overview of the workforce size.
- 4) Helps HR monitor the total number of employees.

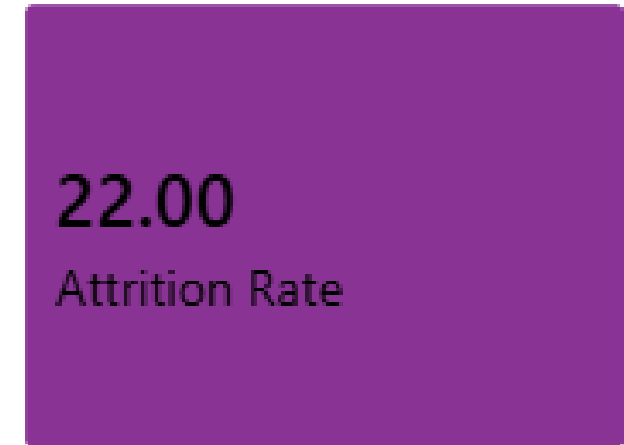

50
Count of Employee ID

ATTRITION RATE

- 1) Attrition means employees leaving the company
- 2) This analysis shows how many employees left and stayed
- 3) It helps HR to understand employee retention and reasons for exit

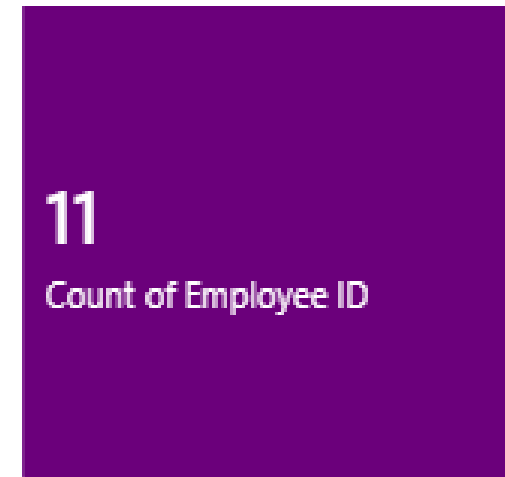

Attrition Rate

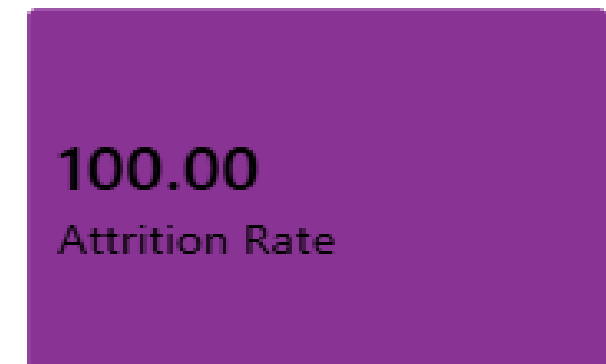

Key Points

- 1) Total employees in dataset: 50
- 2) Attrition is shown using Power BI visuals
- 3) Pie chart used to show **Yes (Left) / No (Stayed)**
- 4) Card visual shows total attrition count

Attrition Rate

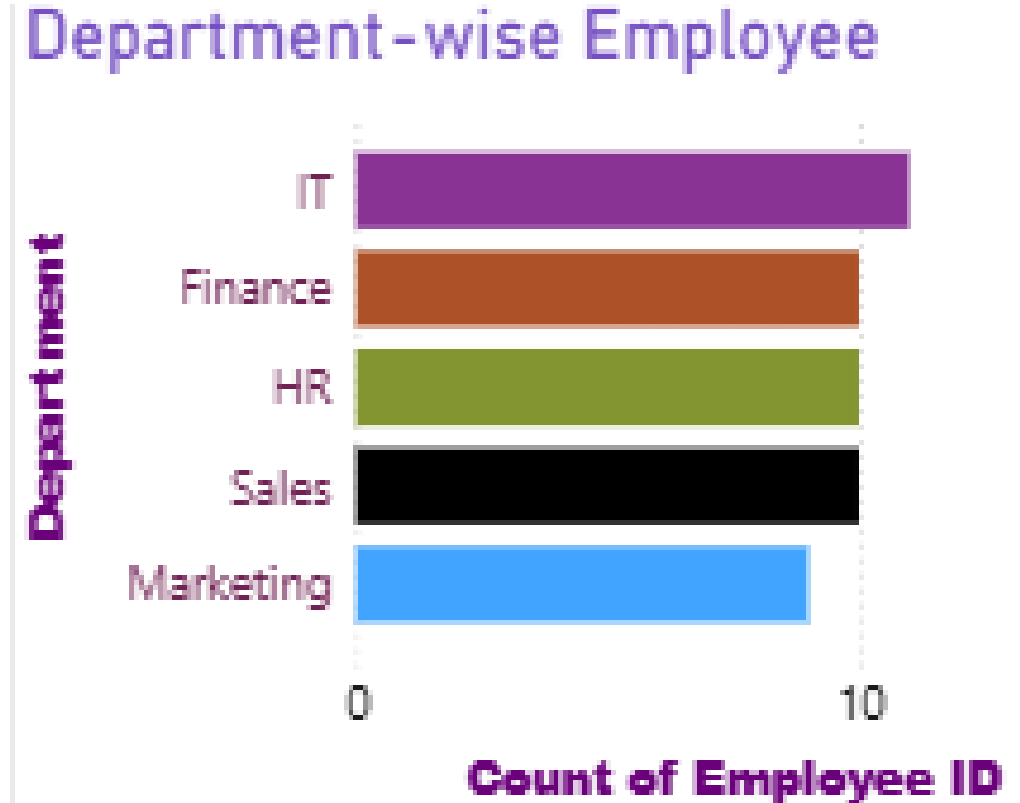

DEPARTMENT-WISE EMPLOYEE ANALYSIS

- This slide shows the distribution of employees across different departments
- It helps to understand how the workforce is divided in the organization
- Each department's employee count is analyzed using Power BI

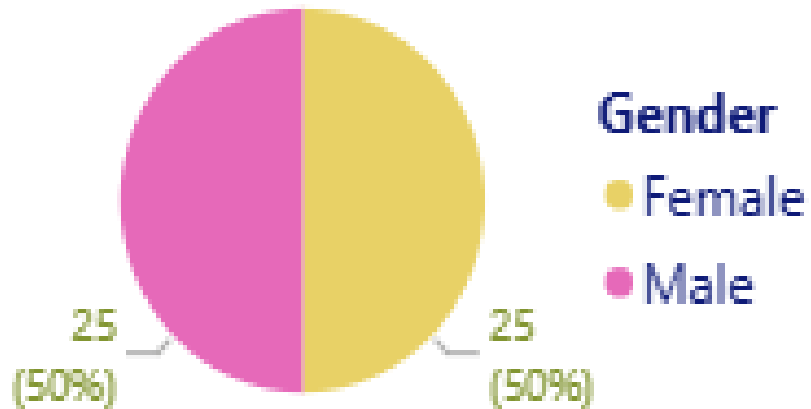

Key Insights

- Dataset contains 50 employee records
- Employees are grouped based on their department
- Bar chart is used to show department-wise employee count
- Helps HR to identify which department has more or fewer employees

GENDER DISTRIBUTION

Gender Distribution

- This slide shows the distribution of employees based on gender
- It helps HR understand the balance between male and female employees
- Useful for diversity analysis in the company

Key Points

- Dataset contains 50 employee records
- Gender is shown using Pie chart or Donut chart in Power BI
- Shows percentage of Male vs Female employees

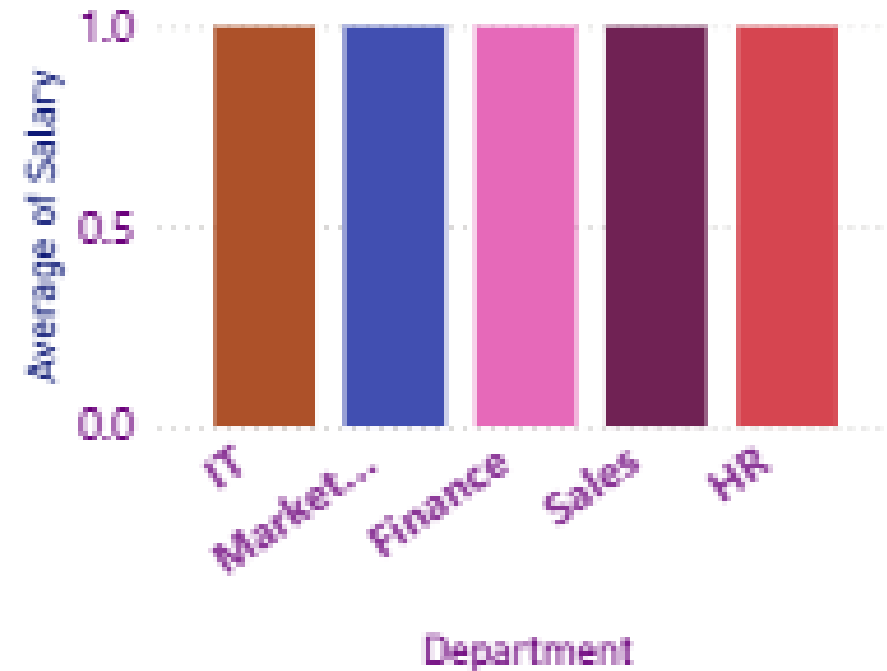

SALARY ANALYSIS

- This slide shows the salary distribution of employees
- It helps HR understand how salaries are spread across the company
- Useful for identifying low, medium, and high salary employees

Key Points

- Dataset contains 50 employee records
- Salary is analyzed using Power BI charts
- Column chart or bar chart is used for visualization
- Helps to compare salary levels across employees or departments

Average Salary by Department

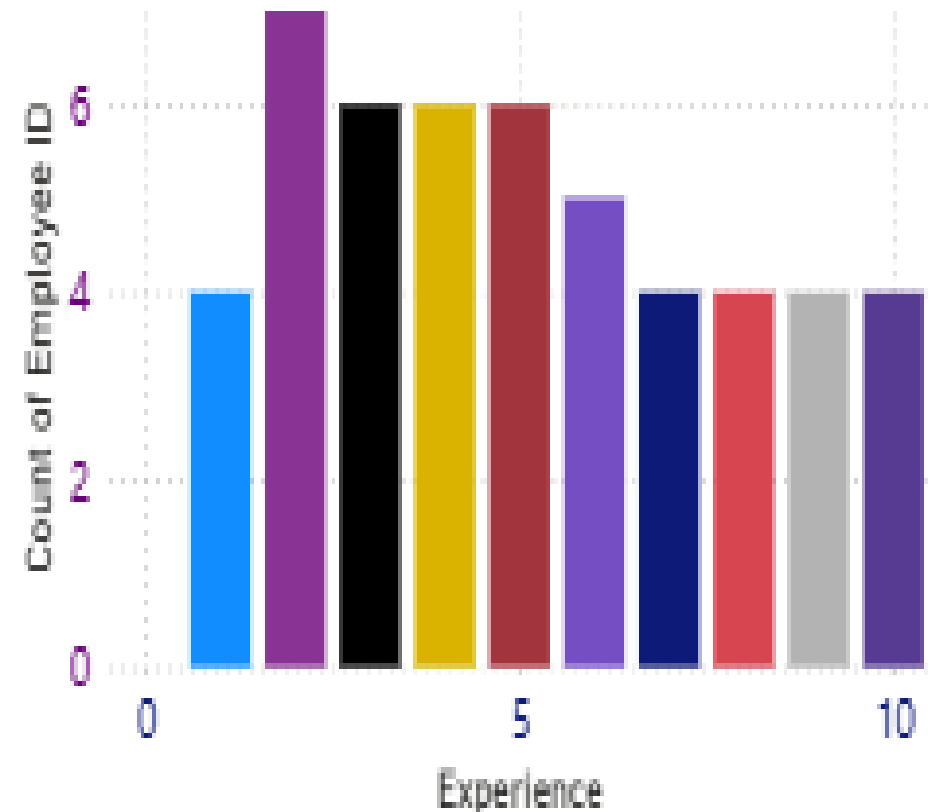

EXPERIENCE ANALYSIS

- This slide shows the experience level of employees in the company
- It helps HR understand how many freshers and experienced employees are working
- Useful for workforce planning and recruitment decisions

Key Points

- Dataset contains 50 employee records
- Experience is analyzed using Power BI charts
- Bar chart is used to show years of experience distribution
- Helps to identify most common experience level in the company

Experience Analysis

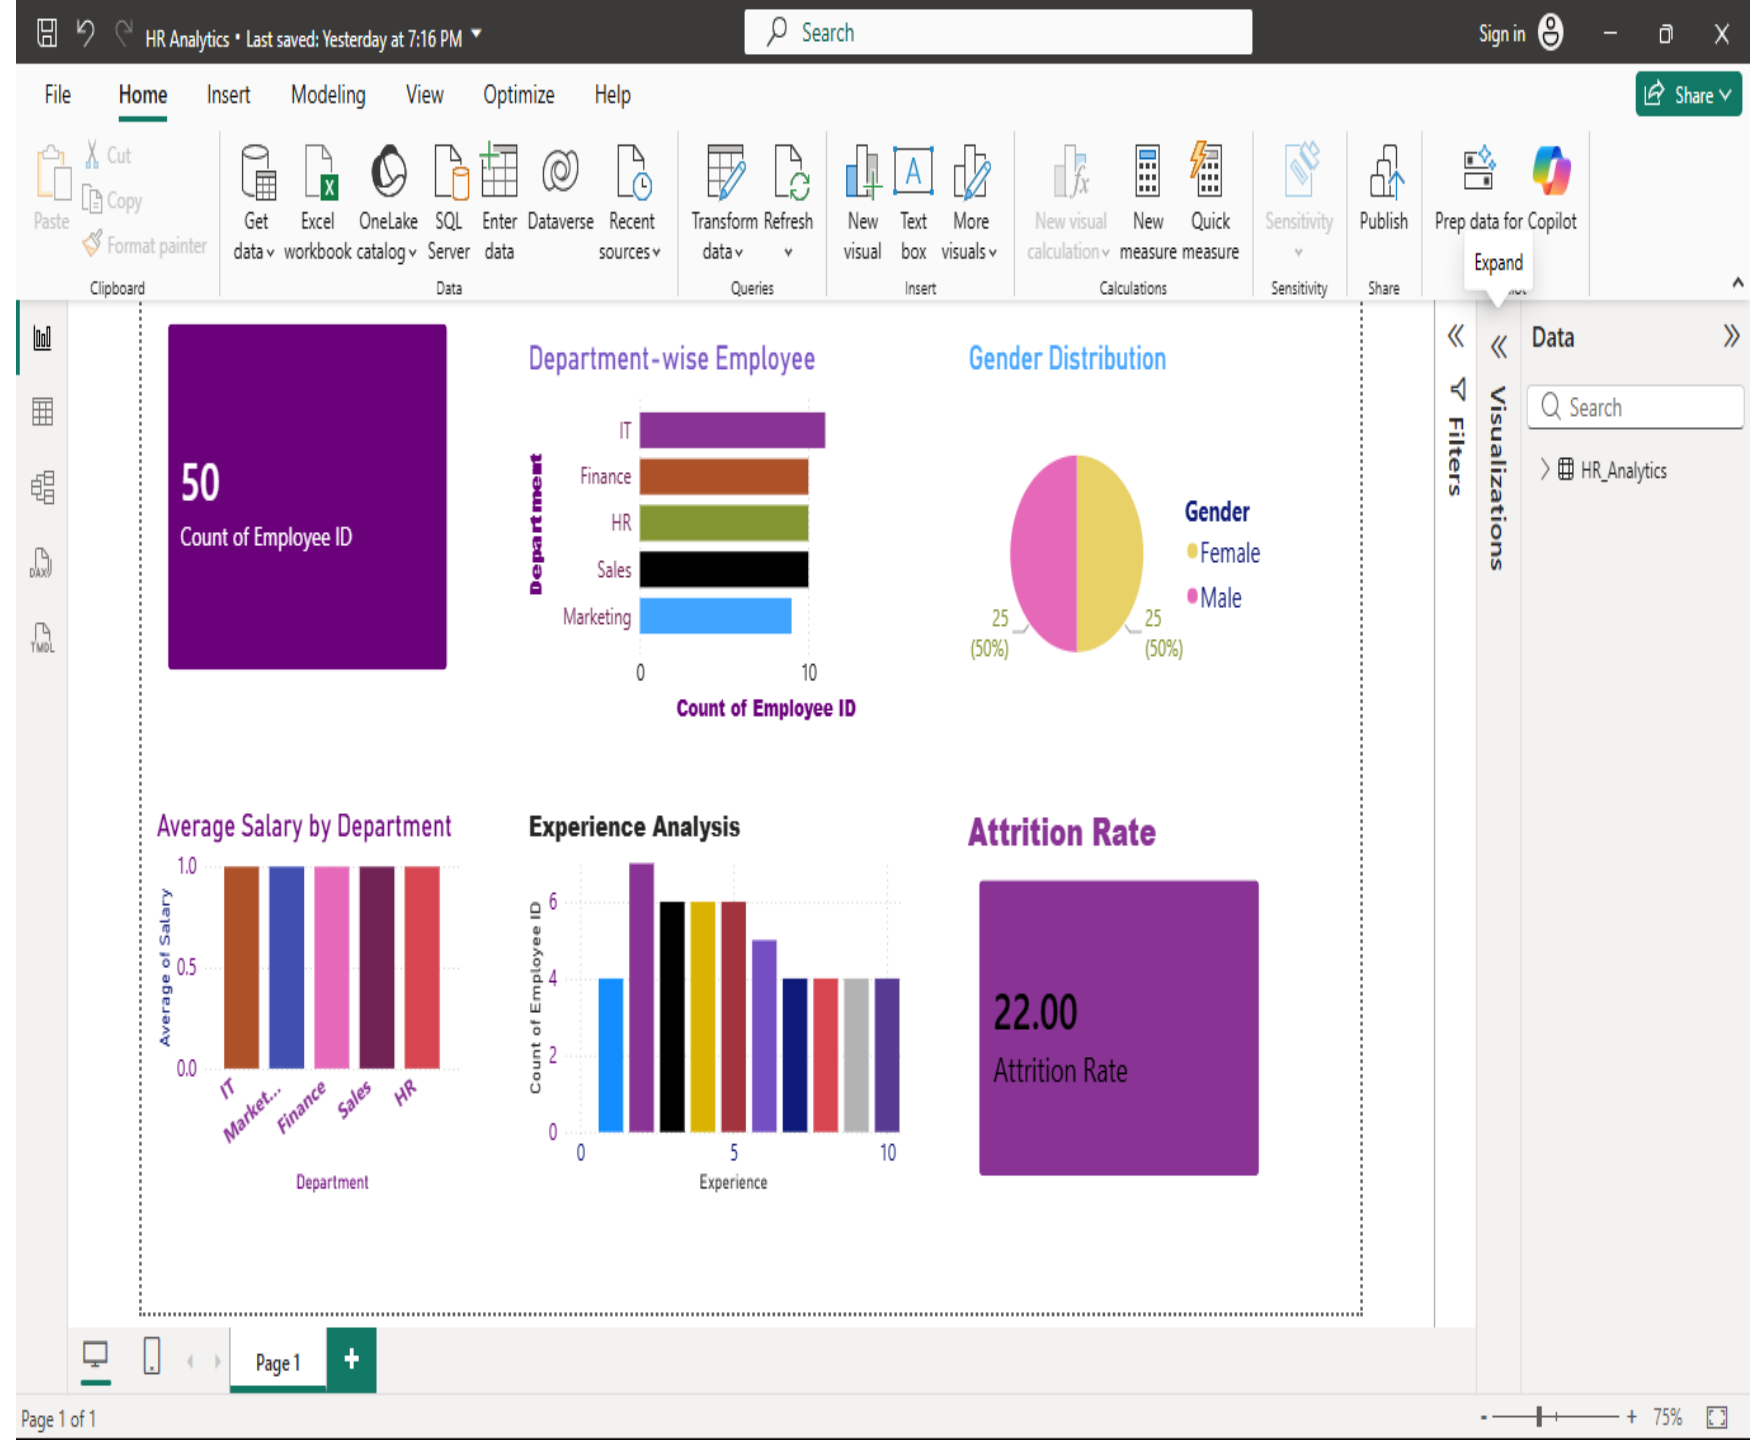

OVERALL HR ANALYTICS DASHBOARD

1) This dashboard provides a complete overview of the HR data.

2) It combines all key HR metrics into a single interactive report.

3) The dashboard includes Employee Count, Department-wise Employees, Attrition Rate, Gender Distribution, Salary Analysis, and Experience Analysis.

4) It helps HR managers analyze employee data and make informed decisions quickly.

Conclusion

- The HR Analytics Dashboard was successfully developed using **Microsoft Excel** and **Power BI**.
- The project analyzed **50 employee records** and presented the data through interactive visualizations.
- Key HR metrics such as **Employee Count, Department-wise Employees, Attrition Rate, Gender Distribution, Salary Analysis, and Experience Analysis** were analyzed.
- This dashboard helps HR professionals understand employee data and supports better decision-making.

THANK YOU
